

Property: 3 floor Town house, Orgiva Ref : SP0007

We have given our Sustainability Rating for this property as 'medium' based on the following answers. Please note that the answers are provided by owners and not validated by us.

Although mains electric is used throughout, this is not considered too negatively since most of Andalusia's electricity is generated by renewable methods. There is no provision for personal food production but this is offset partly owing to the good availability of local food in the town.

House Construction: Brick

Roof Construction: Tiles

House-insulation: Foam and rock wool

Roof-insulation: Foam
